### Finding Reading Fluency Speed: WORDS divided by SECONDS

By dividing [the number of words read] by [the number of seconds it took to read them], you can then use this chart to gauge reading speed in

Words Per Minute (WPM)

this many words per minute	this many words per second	this many words per minute	this many words per second
15 =	.25	85 =	1.42
20 =	.33	90 =	1.50
25 =	.42	95 =	1.58
30 =	.50	100 =	1.67
35 =	.58	105 =	1.75
40 =	.67	110 =	1.83
45 =	.75	115 =	1.92
50 =	.83	120 =	2.00
55 =	.92	125 =	2.08
60 =	1.00	130 =	2.17
65 =	1.08	135 =	2.25
70 =	1.17	140 =	2.33
75 =	1.25	145 =	2.42
80 =	1.33	150 =	2.50

www.jenstrange.com

Ok, how about some examples. Let's say I read 50 words in 50 seconds.  $50 \text{ words} / 50 \text{ seconds} = 1.00 \text{ word per second}$ . On the chart, 1.00 is next to 60, so I read that passage with a speed of 60 WPM.

Let's say I read 60 words in 30 seconds.  $60 \text{ words} / 30 \text{ seconds} = 2.00 \text{ words per second}$ . On the chart, 2.00 is next to 120, so I read that passage with a speed of 120 WPM.

Now for one not so obvious. If I read 85 words in 54 seconds, we'll use the same process to figure out my speed.  $85 \text{ words} / 54 \text{ seconds} = 1.57 \text{ words per second}$ . Looking at the chart, that's at roughly 95 words a minute.

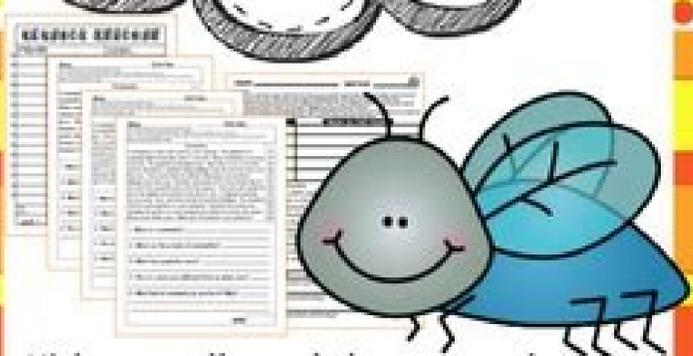

One more. 32 words in 40 seconds.  $32 \text{ words} / 40 \text{ seconds} = .80$ , thus about 50 WPM.

### Reading comprehension and fluency passages & fluency trackers

Kids can all read the same theme on their own level without thinking their story is different!

# Bob

This is my dog.	4
His name is Bob.	8
He is a big brown dog.	14
Bob likes to dig.	18
He likes to dig big holes.	24
He is bad when he digs big holes.	32
My Mom gets mad when he digs big holes.	41
She does not like it when he is bad.	50
Bob gets sad when Mom is mad.	57
I am sad when Bob is bad.	64
I do not like it when Mom gets mad.	73
